PROFESSIONAL SUMMARY

Full Stack Developer (Java | Spring Boot | Angular) with 1+ years of experience including internship and full-time roles in the fintech domain. Built and deployed production-grade banking features for IndusInd Bank, Bandhan Bank, and HDFC Bank. Proficient in RESTful APIs, microservices, JWT authentication, Angular components, and AWS S3. Strong grasp of DSA, OOP, and Agile development practices.

TECHNICAL SKILLS

Languages: Java, JavaScript (ES6), TypeScript, C++

Backend: Spring Boot, RESTful APIs, JWT Authentication, Microservices

Frontend: Angular, React, HTML5, CSS3

Cloud & DevOps: AWS (S3), CI/CD, Docker, Render, Vercel, DigitalOcean

Databases: MongoDB, NoSQL, MySQL

Tools: Git, GitHub, GitLab, Maven, Postman, IntelliJ IDEA, VS Code

Concepts: Data Structures & Algorithms, OOP, DBMS, Agile/Scrum

WORK EXPERIENCE

Associate Software Engineer (Full Stack) | Lentra

Jun 2025 – Jan 2026

Fintech LOS/LMS platform deployed across IndusInd Bank, Bandhan Bank, and HDFC Bank

- Developed and maintained 10+ RESTful APIs using Spring Boot for loan workflow automation, customer onboarding, and eligibility checks — reducing manual processing steps across multiple bank deployments.
- Built 12+ reusable Angular components that improved UI consistency by 25% and cut feature delivery time across 4+ application modules; adopted as standard components across the team.
- Integrated JWT-based authentication and MultiBureau credit verification services, strengthening API security and enabling automated multi-source credit checks for loan eligibility.
- Resolved production-level defects through structured root cause analysis; implemented error handling and input validation improvements that increased system stability across live bank environments.

Full Stack Intern | Lentra

Oct 2024 – May 2025

Internship contributing to the same enterprise LOS/LMS platform

- Contributed to business-critical features for enterprise platforms directly impacting loan processing workflows for thousands of customers.
- Collaborated in Agile sprints and participated in code reviews, gaining hands-on exposure to production fintech systems.

Frontend Developer Intern | Anka Technology Solutions Pvt. Ltd.

Jan 2023 – Jun 2023

- Built responsive Angular UI modules for Refereedge, a production application, delivering features across multiple Agile sprints.
- Optimized Angular rendering, reducing page load time by 30% and improving cross-device compatibility.
- Integrated 10+ RESTful APIs enabling seamless frontend-backend data flow across core application modules.

PROJECTS

FoodieHub – Full Stack Food Delivery App |

Dec 2025 – Jan 2026

- Built end-to-end food delivery platform with user authentication, menu browsing, cart management, and order tracking using Spring Boot + Angular.
- Developed scalable RESTful APIs for user registration, product management, and order processing with structured error handling and input validation.
- Integrated JWT authentication, Razorpay payment gateway, and AWS S3 for secure sessions, transactions, and media storage.
- Deployed backend on Render and frontend on Vercel with CI/CD pipelines ensuring zero-downtime updates.

GitHub: github.com/meghna-bansod/foodiehub | Live: foodiehub.vercel.app

TweetBuddy – Real-Time Social Networking App |

Feb 2024 – May 2024

- Built a real-time social networking platform using Socket.io enabling live interactions — instant post updates and notifications.
- Consumed RESTful APIs for CRUD operations ensuring seamless frontend-backend data synchronization.
